Subject: RE: Riverside Drive Speed Humps

Hello William:

I am afraid you are barking up the wrong tree. Installing the humps was not my idea neither was it Council's idea. The request came from people living in your own neighborhood.

It is the SVCA which stands for Seymour Valley Community Association which requested that a survey be conducted asking the people on Riverside Drive whether they are in favor of the speed humps. It turned out that the majority, albeit small, were in favor and so we acquiesced.

Let's face it, William, the people in your neighborhood just did not pay any attention and now some of them are trying to put the blame on the politicians - not guilty this time. As for your question when the next election is - it will be soon. As for the humps, I have good news for you as well.

One - the speed humps are being reduced in height but more important our staff will facilitate a joint meeting of the warring factions on your street to try and work things out. They say that what people on a street have in common is greater than that which divides them. Let's face it William, by taking a little interest in the neighborhood, the mix-up could have been avoided. Even so maybe something good will come of it.

For one thing a meeting amongst the neighbors is a wonderful opportunity for them to get to know each others concerns. It is also an opportunity to form a truly democratic and full fledged neighborhood association speaking with one voice. I am sure you agree that it would make our job a lot easier - not to speak of the money we would save.

Thank you,

Yours truly,

Ernie Crist

Hey Ernie, what's the deal with you punishing us in the Riverside area?? You used to be the champion of average citizens.

Your traffic studies indicated there never was a problem, but you put
