Subject: RE: Sewage Treatment Plant Problems..

Dear Mr. Kost:

As you are aware I have on many occasions raised the alarm regarding this situation. I have done so in public, In Camera, when I was on the relevant GVRD committees and during GVRD Council of Council meetings. I have done so through motions and other initiatives as indeed you have. My efforts have evoked hilarity and insults. For my efforts I have been kicked off all GVRD Committees.

The body politics including in the District is simply not cognizant of the seriousness of this issue. Neither is the District Staff. The result will be escalating risks across the whole spectrum of public health. It is just a matter of time.

The District representative to the GVRD is not providing any kind of leadership and never has any more than he has in any other area. Indeed with the assistance of District Council he has nixed any and all attempts on my part to put this and related issues on the front burner.

That we allow the dumping of raw sewage into the water system, that we allow untreated runoff waters into the rivers and streams when they carry with them all the toxins collected from the streets and when we know full well that this will kill marine life which if ingested causes cancer and other diseases in humans can only mean that in terms of development, so called government and accepting responsibility we are nothing more then barbarians.

Yours truly,

Ernie Crist

Your Worship & Members of Council,

In light of recent articles in the SUN I thought you
might be interested in having a copy of a "facts sheet"
I have recently distributed on this subject.

Yours truly,

Corrie Kost
