To the Mayor and Council,

As a resident and property owner in the District, I wish to record my opposition to the financing of the twinning of the Dollarton bridge by allowing a private company to erect billboards on District roads. I am not convinced that the twinning of the bridge would resolve any traffic congestion problem, and even if it did, I would much prefer to have to face an increase in my property tax rate, or wait until the District is in the financial position to pay for the work, than have to put up with the erection of disfiguring billboards in our lovely area. I am also very concerned about the negative effect the billboards would have on property values.

I am sure a majority of District residents share my views, and hope that the Council will take them into account in their consideration of the issue.

Thank you.
