Planning the Third Crossing

Opportunities and Challenges for a Tunnel Connection between Vancouver and the North Shore

- 90 % of adults in Greater Vancouver believe the North Shore bridges will be inadequate within ten years.
- A new tunnel to the North Shore could eliminate one-half of all the traffic congestion in downtown Vancouver.
- It is time to begin planning a third, underground crossing now.

Who is responsible for planning, building and operating a new tunnel?
What modes of transportation should be included – Road? Rail? Other?
When should it be built?
Where should it connect on the North and South shores?
How will we pay for it?

Hear a panel of experts discuss these questions and offer your own ideas on this important project.

Vancouver Forum	North Shore Forum
7 PM – 9 PM	7 PM – 9 PM
Wednesday, September 4, 2002	Wednesday, September 11, 2002
Coal Harbour Community Centre	Mickey McDougall recCentre
