Dear Ms Hille:

I am in receipt of your letter to Mayor and Council re your request for a community center in the Lower Capilano area. The way to get results is for all affected neighborhoods to unite and spell out their demands. It is the first important steps to get results. You are entitled to a community center regardless as to what other areas got or did not get.

As for money? The District is using millions of dollars from its Heritage Fund i.e. proceeds from land sales to cover operating expenses annually when such funds should be used for capital projects such as the one you are requesting.

The District is also subsidizing the City of North Vancouver via the Rec Commission for no rhyme or reason other than for political expediency - no wonder therefore there is no money for our own citizens. But as long as the citizens are silent, "run of the mill" politicians will continue with business as usual - silence and public meekness will be taken as acquiescence and no change will ever occur. The people in your area have to speak up - it is as simple as that. Remember Unity is the Key.

Thank you,

Ernie Crist
