Subject: witchhunt

Editor

What does an "accused" do when a formal tribunal mandated to prosecute him fails to meet and fails to honour the mandate? He ignores the nonsense of course.

What does this "accused" do when one of the tribunal members suggests an 'alternative' to the above? One which will be less costly, and no doubt more "user friendly". He ignores it of course.

What does the "accused" do when the CAO of the witchhunt organization makes unwarranted public comment on the matter, and then suggests to the "accused" that they meet informally over coffee to discuss the above? He ignores this insulting suggestion of course.

And what will the governing body of the witchhunt organization do now, after they have publicly admitted the entire process is toothless? Probably throw even more money at the nonsense. And why is this? Because the organization in question is the District of North Vancouver, which destroys everything it can get its hands on.
