FYI,

Here is a letter Dr. Burton wrote Nov'01 in anticipation of Kevin Bell's bear management report that had be requested by Council. This report took a year to write and was never approved by senior staff and never saw the light of day even though the Bear Network and myself asked repeatedly that it be made public.

Dr.Burton was on the Large Mammal Committee for the Province in the '90's regarding management of both Grizzlies and Black Bears in this province and knows bears and people well.

Thanks,

Barb

Subject: North Shore Bear Advocates

Dear all

I support requirements for bear proof garbage containers, not just to save bears, but for safety reasons. One of our neighbours keeps his garbage outside in ordinary cans; not only to we have garbage t spread over lawns and streets, but we have a succession of bears in the neighbourhood, even in daytime. There is a path to the school here. Sooner or later, we will have a tragedy.

Some thought need also be given to bird feeders and fruit trees, but I think garbage is the big issue.

sincerely

John Hunter
