Dear all

I support requirements for bear proof garbage containers, not just to save bears, but for safety reasons. One of our neighbours keeps his garbage outside in ordinary cans; not only to we have garbage t spread over lawns and streets, but we have a succession of bears in the neighbourhood, even in daytime. There is a path to the school here. Sooner or later, we will have a tragedy.

Some thought need also be given to bird feeders and fruit trees, but I think garbage is the big issue.

sincerely

John Hunter
