Hello Corrie,

Residents of our community have been concerned for some time with the speed of traffic along Fullerton Avenue and Curling Road. Speed surveys undertaken by RCMP were deemed suboptimal by DNV Streets and Traffic department.

In light of this situation, the Capilano Gateway Association purchased a radar gun for use by FASIC, our local traffic committee, developing speed surveys along local streets. The data from these surveys will be useful as part of plans for improving public safety.

In recognition of the fact that a number of other communities within the DNV have similar concerns with respect to safety and vehicle speeds within their neighbourhoods, we would like to offer the use of our [radar gun](#) by other associations. The gun is simple to operate, with an accuracy of +/- 1 mph and can record vehicles at 1,500 ft. distance.

To help offset the cost of the gun we are asking for a \$10 weekly donation to our association. Please let us know if you would like to book the gun for use by your group.

best regards,
